

Year 1 Science: Amphibians: smooth, wet skin: answers

Year 1 - Animal Groups - Lesson 4.2

Answers. Final answers to the worksheet questions. Full step-by-step solutions for every question are free at websink.site/ks1/science/year-1/ch04-animal-groups/amphibians-smooth-wet-skin/

Exercise 4B Amphibians

1 Which group is a frog in: fish, amphibian, reptile, bird or mammal?

Answer: amphibian

2 What is the skin of an adult frog like: smooth and wet, or dry and scaly?

Answer: smooth and wet

3 Does a tadpole live in water or on land?

Answer: water

4 What is the name for the eggs that a frog lays in a pond?

Answer: frogspawn

5 Where do frogs lay their eggs: in water, or in a nest in a tree?

Answer: in water

6 Match each feature to a group. Write fish, amphibian or bird.

(a) Smooth, wet skin with no scales

Answer: amphibian

(b) Fins and scales

Answer: fish

(c) Feathers and a beak

Answer: bird

7 Which does an adult frog have: gills or lungs?

Answer: lungs

8

Tom says a frog is a fish, because it lives in water. Is Tom right? Explain.

Answer: No. A frog has smooth, wet skin and legs. A fish has fins and scales.

9

Put these in the order that they happen: frog, frogspawn, tadpole.

Answer: frogspawn, tadpole, frog

10

Working scientifically: Look at a picture of a frog and a picture of a fish. What did you notice? Name one thing that is the same and one thing that is different.

Answer: Accept: both have eyes. Different: a frog has smooth, wet skin and legs; a fish has scales and fins.
