Answer: reptile

4 Which group is this animal in?

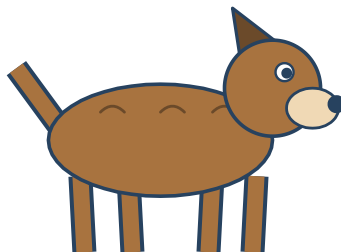

Answer: bird

5 Which group is this animal in?

Answer: mammal

6 How many legs does this dog have?

Answer: 4

7 What covers most fish?

Answer: scales

8 Where does a tadpole live?

Answer: water

9 Write one feature that all mammals have.

Answer: fur or hair (accept: feeds its babies on milk)

10 Is a spider one of the five groups? Write yes or no.

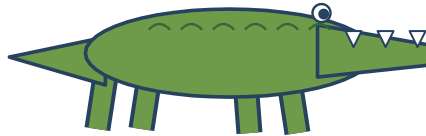

Answer: no

Exercise 4X End-of-chapter quiz

1 Which group does a bat belong to? [1 mark]

Answer: mammal

2 How many legs does this crocodile have? [1 mark]

Answer: 4

3 What do birds have instead of teeth? [1 mark]

Answer: beak

4 Sort these animals into the groups. Write the group for each: shark, robin, frog, snake. [2 marks]

Answer: shark: fish; robin: bird; frog: amphibian; snake: reptile

5 Where do frogs lay their eggs? [1 mark]

Answer: in water

6 Explain two reasons why a whale is a mammal and not a fish. [2 marks]

Answer: It breathes air through a blowhole, and it feeds its babies on milk.

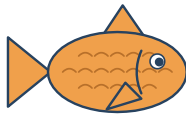

7 Which animal has dry, scaly skin: a frog or a snake? [1 mark]

Answer: snake

8 Tom says a penguin is not a bird, because it cannot fly. Explain why he is wrong. [2 marks]

Answer: A penguin has feathers and a beak, so it is a bird.

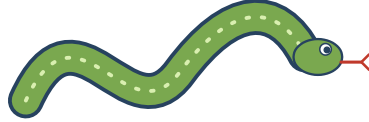

9 The picture shows animals A to F. Which letter is a spider? [1 mark]

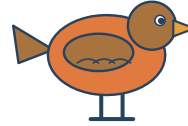

A

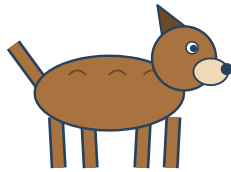

B

C

D

E

F

Answer: F

10

Working scientifically: How could we find out which group a new animal is in? Name two things you would check.

[2 marks]

Answer: Accept: its covering (feathers, fur, scales or smooth skin), its legs, where it lives, or how it breathes.
