

Year 1 Science: Beaks and shells: answers

Year 1 - What Animals Eat - Lesson 5.6

Answers. Final answers to the worksheet questions. Full step-by-step solutions for every question are free at websink.site/ks1/science/year-1/ch05-what-animals-eat/beaks-and-shells/

Exercise 5F Beaks and shells

1 Fill the gap: birds have ___ instead of teeth.

Answer: beaks

2 Fill the gap: a duck has a ___ beak for picking up food from water.

Answer: flat

3 Which beak is hooked: eagle or robin?

Answer: eagle

4 Which animal has a shell: snail or shark?

Answer: snail

5 True or false? Birds have teeth.

Answer: False

6 Match each bird to the job of its beak.

(a) Eagle

Answer: tearing meat

(b) Duck

Answer: picking up food from water

(c) Robin

Answer: picking up insects

7 Odd one out: tortoise, snail, crab, cow. Which one is the odd one out? Explain.

Answer: cow. It does not have a shell.

8 Name a pet that has a shell.

Answer: tortoise

9 Explain why a tortoise needs its shell.

Answer: Its shell protects its body.

10

Tom says a robin's beak is good for tearing meat. Is he right? Explain.

Answer: No. A robin has a thin beak for picking up insects. A hooked beak tears meat.

11

Working scientifically: What did you notice about the snail's shell? What do you think the shell is for?

Answer: Accept sensible answers, such as: it is hard and round. It keeps the snail safe.
